

The road is realigned in front of Foster Court, continuing around the estate where there is now a dead end.

New trees are planted around the estate, created a green and leafy environment.

New storage units are created for all existing residents, replacing the storage sheds that will be demolished. Storage units are enclosed in a timber structure.

Timber fencing continues from the storage units to the new extra care building.

ENSURING FOSTERS ESTATE WORKS SMOOTHLY

The masterplan for Fosters Estate is an opportunity to create an arrangement for storage, refuse and parking which works efficiently and creates a better quality environment for everyone.
